EMPOWERING SUCCESSFUL LEARNING

- Nur Amirah Arzami
- Specialist Tutor
- Educational Therapist
- Former Behaviour Therapist

What is SpLD?

Specific Learning
Difficulties

Specific Learning Difficulties (SpLD)

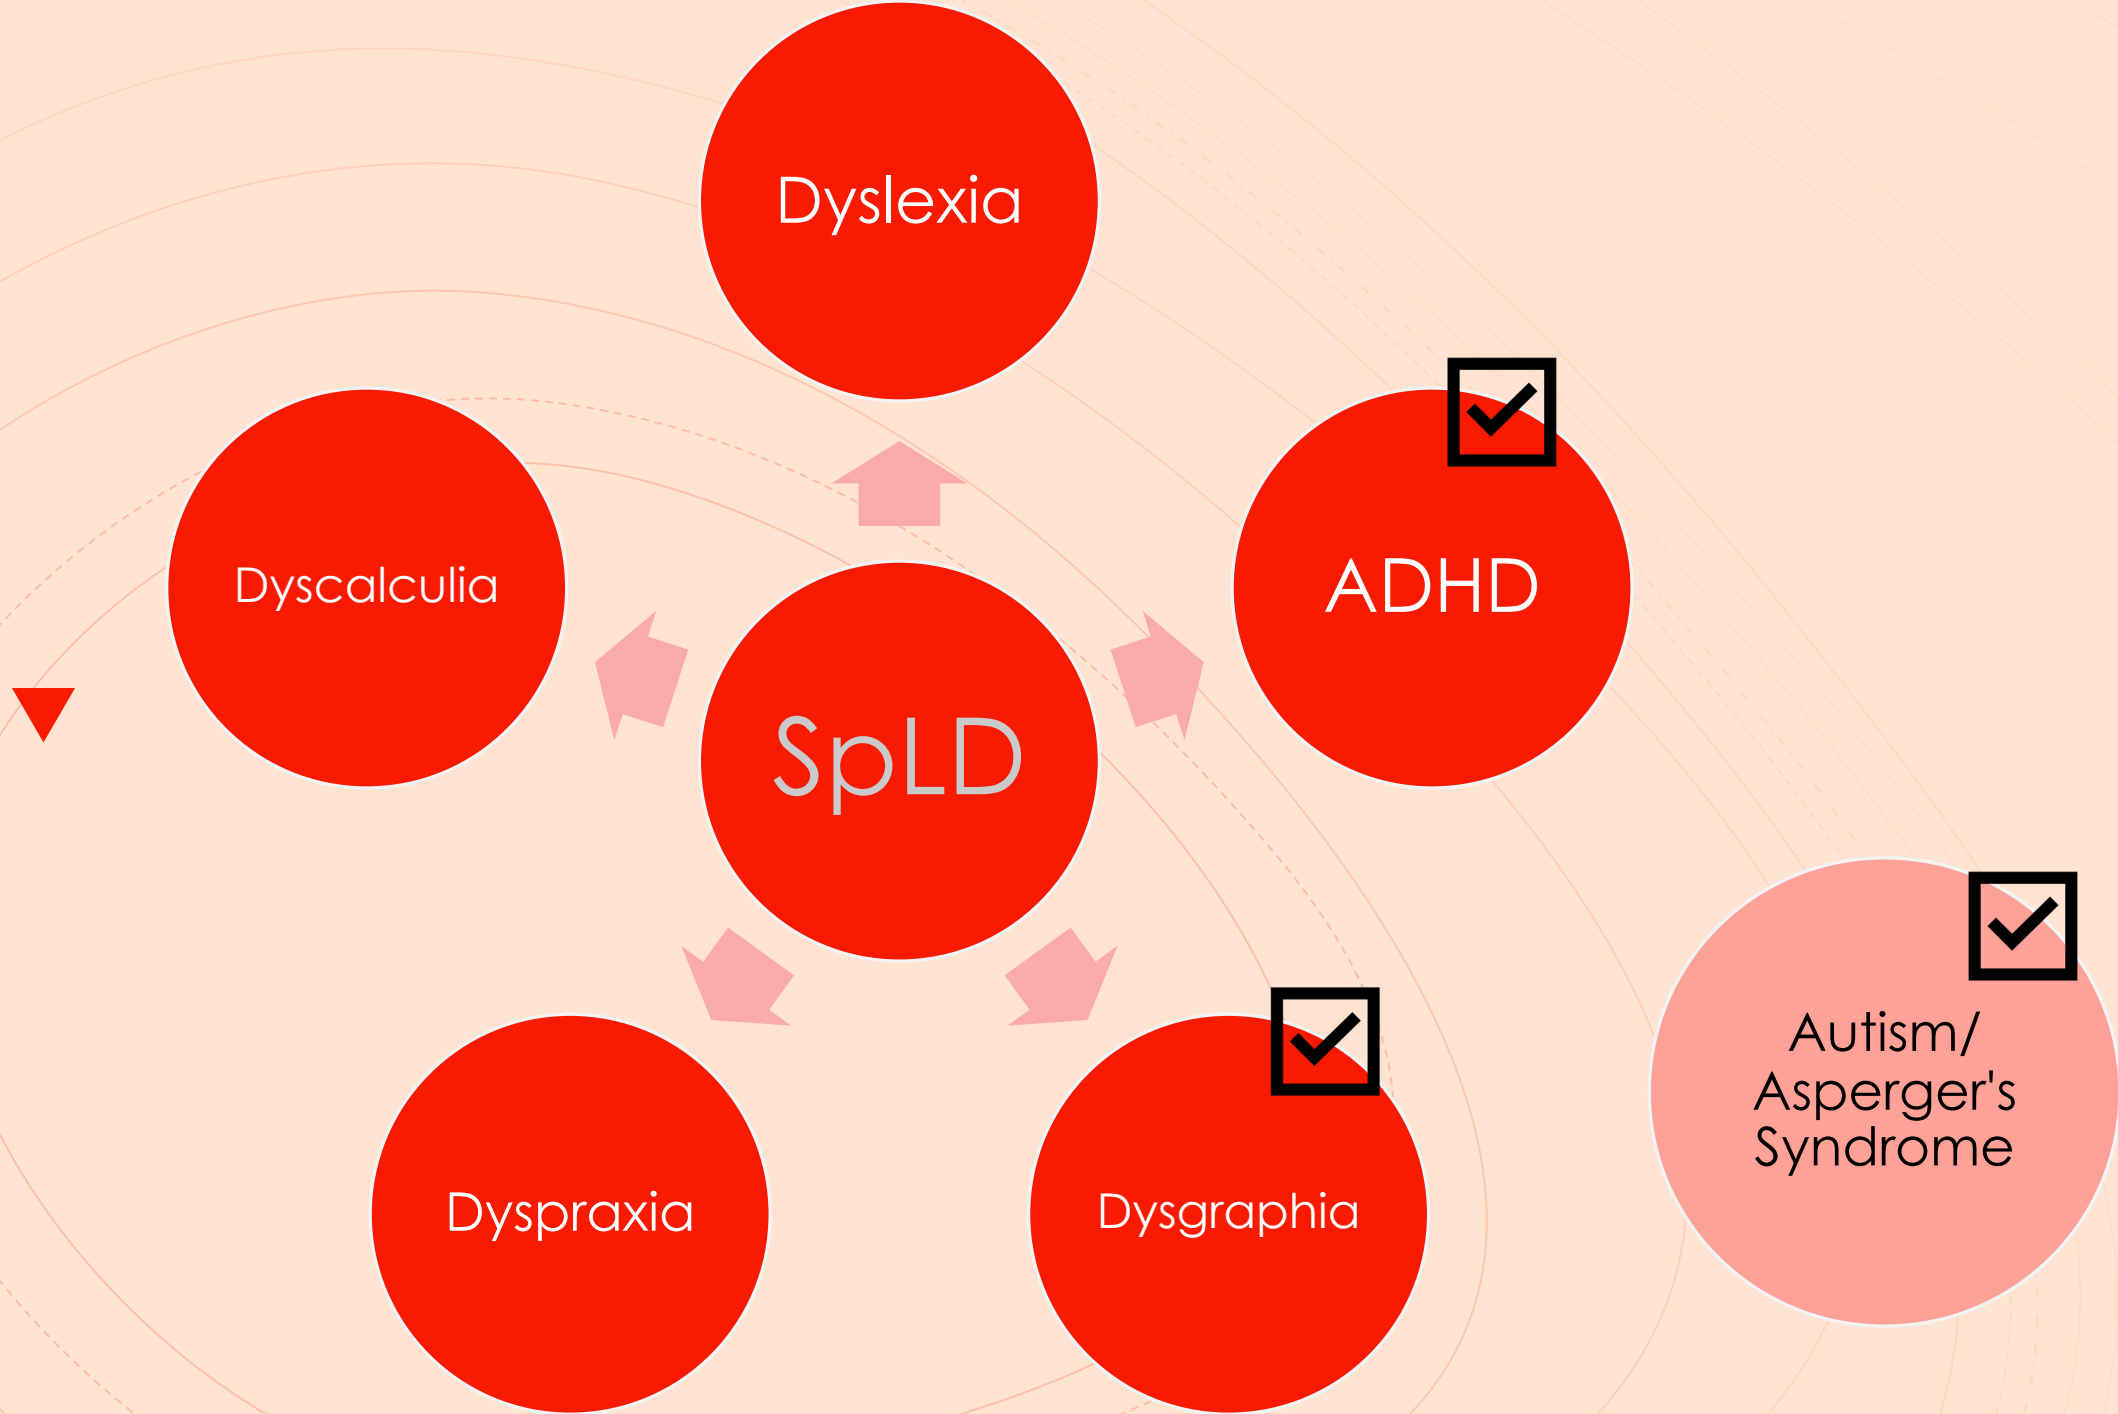

- Differences or difficulties with aspects of learning
- Affects learning: Processing of information, ability with spoken or written language, arithmetic ability
- Affects the physical: Organisation of movements, gross and fine motor

For people with SpLDs, the learning journey can be a lot harder and require much more effort.

SpLDs are independent of intellectual ability, socioeconomic background or language background

Dyslexia

Dyscalculia

SpLD

ADHD

Dyspraxia

Dysgraphia

Autism/
Asperger's
Syndrome

Dyslexia

Dyslexia

- Deficits in the phonological component of language (representation of speech sounds)

- Difficulties in accurate and/or fluent word recognition, reading comprehension, writing, and spelling
- Need extra effort in reading a word

- Can cause attention, behavioural or emotional problems (Rutter and Maughan, 2005)
- Frustration, agitation, acting out avoidance, and withdrawal from learning tasks (Fleming et al., 2004, Kellam et al., 1998, Walker et al., 1995)

Spell:

theme

My cute ^(puppy) puppy

With a ^{(gym) (pot)} jim pot

refuse

~~holding~~ coding a ~~robot~~ robot

Dictation:

The ^(dry) dry and ^(slimy) slimy frog ^(hopped) hopped into the ^(tub) tub.

The dry and slimy frog hopped into the tub.

A large, vibrant red speech bubble is the central focus of the image. Inside the bubble, the words "Intervention for Dyslexia" are written in a clean, white, sans-serif font. The bubble is set against a light beige background that features a series of thin, concentric, curved lines in a light grey color, some of which are dashed. A dark grey, curved shape is positioned behind the bottom-left edge of the red bubble, suggesting it is part of a larger graphic element.

Intervention for Dyslexia

Prevalence of
Co-Morbidities with
Dyslexia

Dyslexia + Attention Deficit Hyperactivity Disorder (ADHD)

Co-Morbidity	What is it	Symptoms	Prevalence with Dyslexia
ADHD	<ul style="list-style-type: none">• Inattentiveness• Hyperactivity & impulsiveness• Combined	<ul style="list-style-type: none">• Short attention span• Slow processing or response time• Forgets easily• Prefers to move/ walk around• Unable to focus and finish tasks• Difficulty with carrying out instructions	53-72% (Cheung et al., 2012)

Dyslexia + ADHD

Dyslexia

- Literacy difficulties
- Reading
- Spelling

ADHD

Effects:
ST Memory
Inconsistent
Organization skills
Externalising behaviours
eg. off-task, disengagement

- Short attention span
- Unable to sit still
- Slow response

Gifted
Creative

Dyslexia + Dysgraphia

Co-Morbidity	What is it	Symptoms	Prevalence with Dyslexia
Dysgraphia	<ul style="list-style-type: none">• Difficulties in the acquisition of writing skills• Affects both information and motor processing• Impaired ability to organise and express thoughts	<ul style="list-style-type: none">• Messy handwriting, problems with pencil grip• Slow and effortful writing• Writing performance below peer level• Poor spelling and grammar, run on sentences, lack of paragraphs	No accurate number found

Dyslexia + Dysgraphia

Dyslexia

- Literacy difficulties
- Reading
- Spelling

Dysgraphia

Effects:

- Organization skills
- Frustration
- Self esteem
- Task compliance
- Poor literacy skills
- Spoken and written expression
- Impaired motor skills
- Poor spelling
- Run-on sentences
- Poor paragraphing

Dyslexia + Autism/Asperger's Syndrome

Co-Morbidity	What is it	Symptoms	Prevalence with Dyslexia
Autism / Asperger's Syndrome (AS)	<ul style="list-style-type: none">• Deficits in cognition• Abnormalities in social interaction and communication	<ul style="list-style-type: none">• Problems with feelings/emotions• Problems with empathy• Difficult to read contextual clues and implied meaning• Difficulty with attention• Problems with imitation• May communicate with less expression• High levels of anxiety → meltdowns	14% (Hofvander et al., 2009)

Dyslexia + Autism / AS

Dyslexia

- Literacy difficulties
- Reading
- Spelling

Autism/ AS

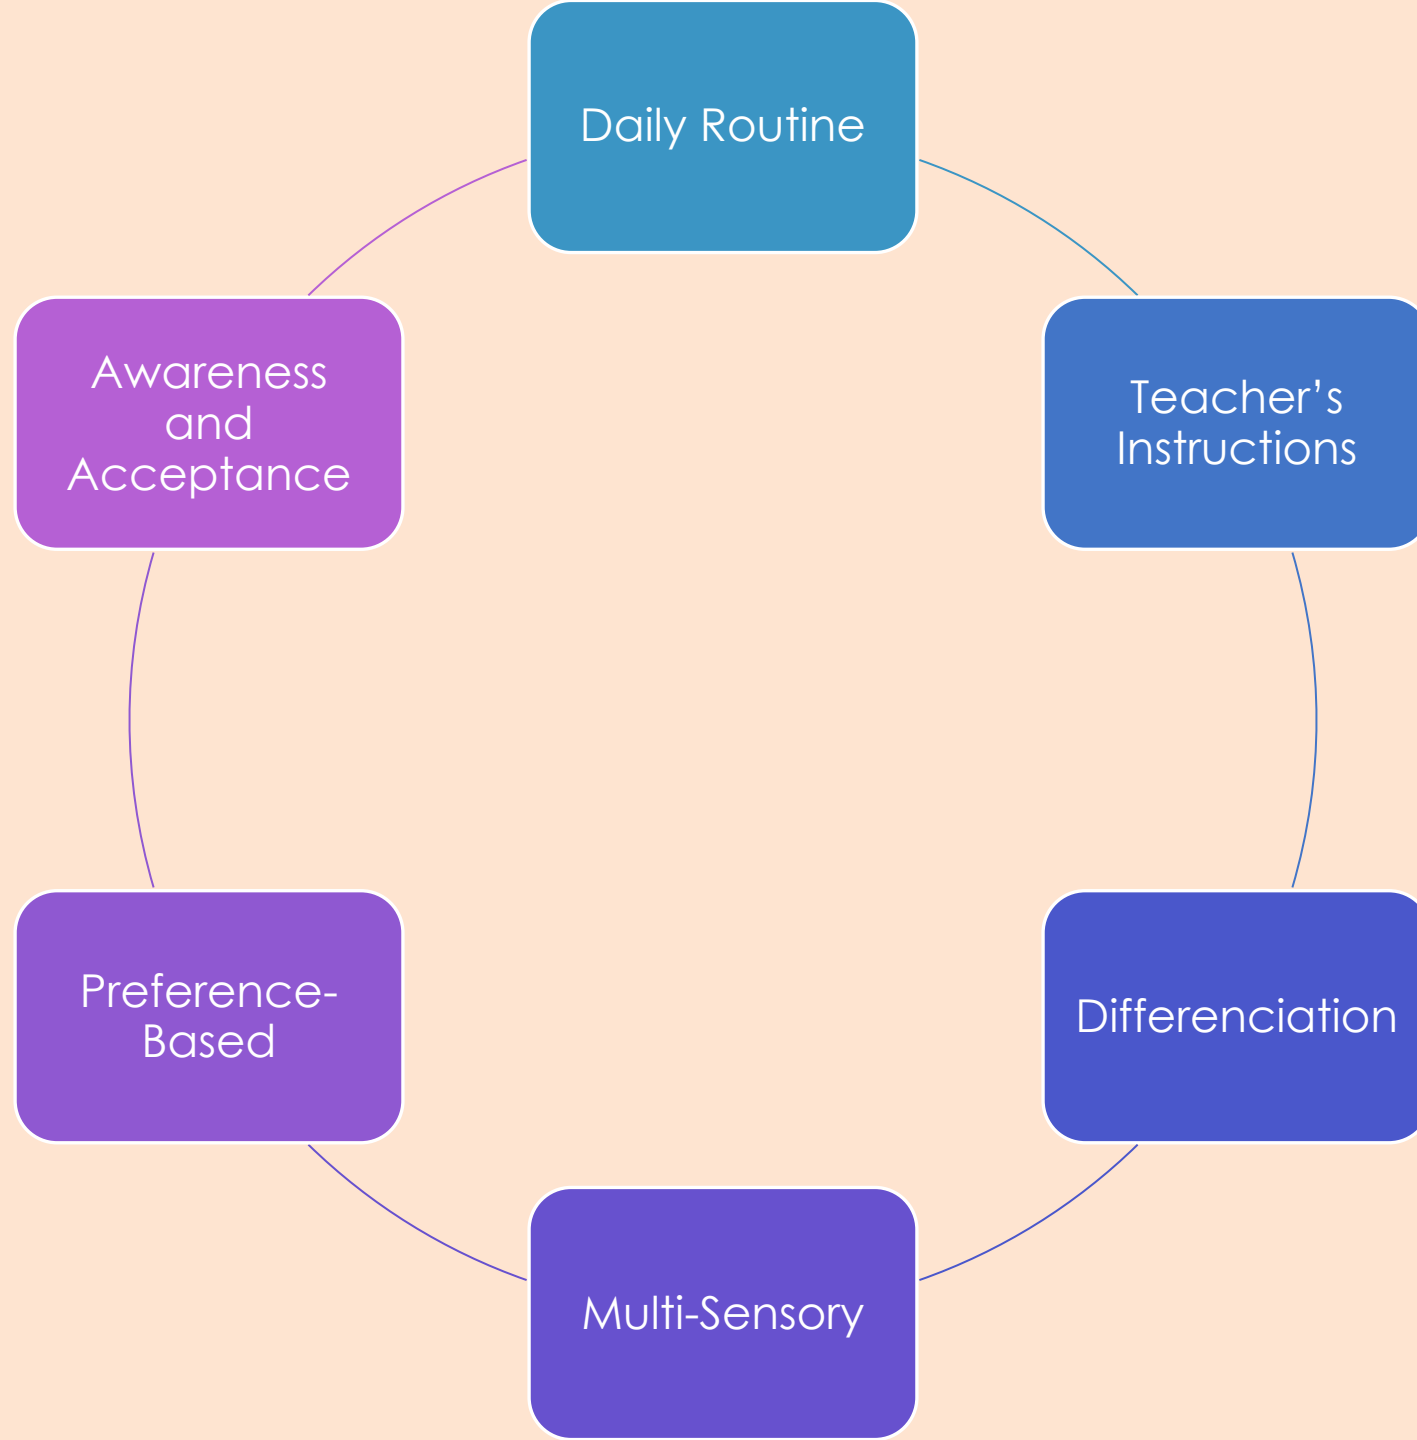

- Diff in social skills and empathy
- Attention issues
- Hyper/hypo sensitivity
- Anxiety

Effects:

Seclusion
Visual and auditory processing diff
Higher level comprehension diff
Off-tasks
Strengths in design, logic, creative skills

Strategies on Supporting
Co-Morbidities

Daily Routine

Agenda for the day gives students a head's up

Checklist

Plan the structure of the lesson

Include as many breaks as needed

Teacher's Instructions

- Short and clear
- 1-2 steps
- Repeat instructions if needed

Differentiation

Level of
difficulty

Amount of
work

Tools/medium:
whiteboard,
technology,
verbal, pencil
grip

Time

Environment

Games

Main idea: My favourite game is Mobile Legend.

Detail #1: Mobik Legend is very

Pets

I would like have a dog as a pet.

Dogs are cute and s

Plants that Eat Insects

You may be surprised to learn that some plants actually eat insects.

Insect-eating plants grow mainly in places where the soil is poor in nitrogen. The insects take the nutrients from the plants.

These plants have various methods of trapping insects with the leaves of the plants.

The Venus flytrap catches an insect when one touches the leaf of the plant.

The leaf remains closed until the insect has been digested.

When a leaf has

The Duck Race

Answer the following questions.

answered verbally

1. The duck race was _____'s idea.

2. Who began the race?

3. Where did they have the race?

4. What happened to Biff's duck?

a. Stuck in the reeds.

b. Sank.

c. Stuck on a log.

d. Stuck in the weeds.

Look for words ending with -ck and write them below.

~~duck~~ ~~truck~~ ~~knock~~
stuck

Multi-Sensory

- Movement
