hi

A little bit about me ...

Objectives

Start thinking about barriers in instruction

Consider design options to reduce barriers

Introduce the Universal Design for Learning (UDL) mindset

Promote equity and inclusion to make education institutes become positive places of learning

WHY UNIVERSAL DESIGN FOR LEARNING?

Classrooms are filled with students who:

Intrinsic Enablers – 3 human characteristics

My skills – what I can do

My limitations – what I cannot do

My motivation – What I want to do

(Bailey, 1989)

Extrinsic Enablers

Explore and suggest assistive technology (AT) that can help improve human performance in the presence of a learning difference

DAS International

EMPOWERING SUCCESSFUL LEARNING

Schedule a Learning Experience Online / Face-2-face

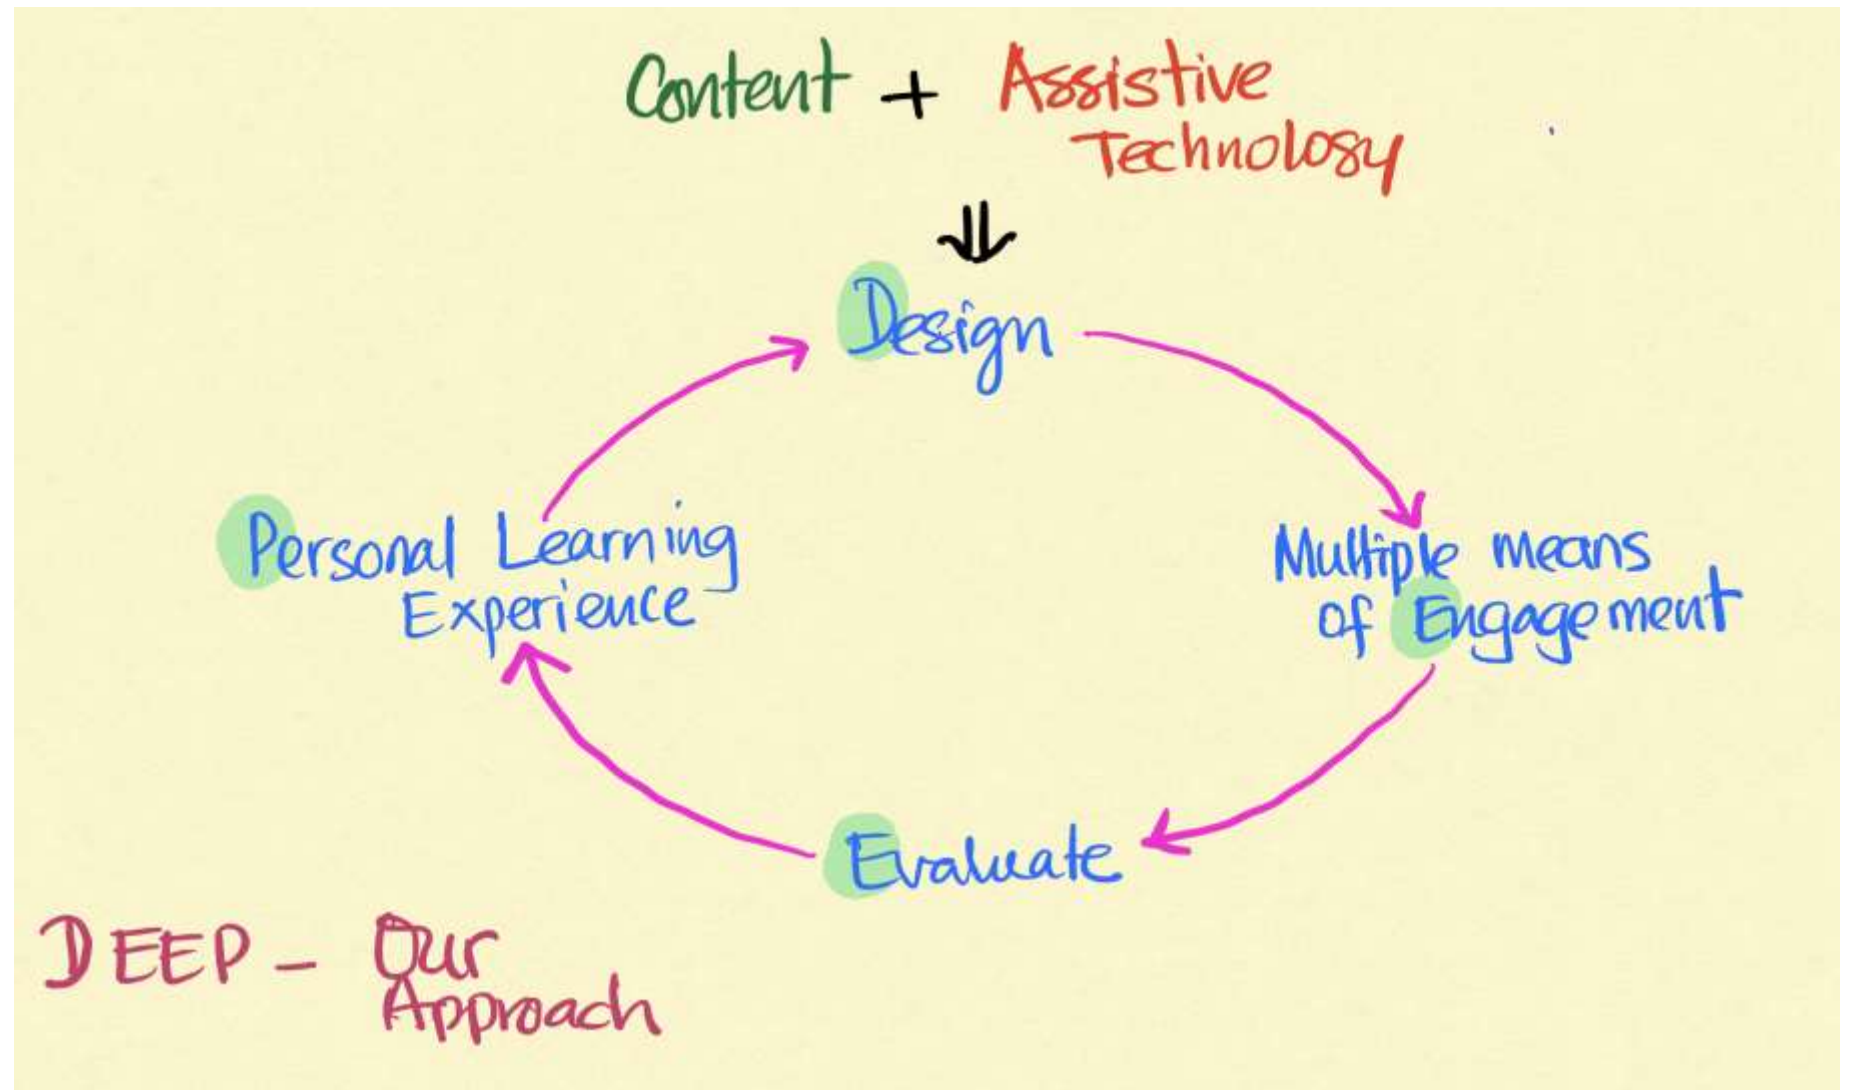

3 Main Components:

Content – What am I going to teach?

Pedagogy – How am I going to teach?

Technology – How am I going to use AT?

Personalise!

Where am I?

Where is my student?

Where do I want to end up?

Where did I end up?

Adjust my learning experience!

**Adjusting my
Teaching
Approach**

the challenges of writing problems

"My students hate to write!"
"The ideas are there, but jumbled."
"If I could only read their handwriting, I might be able to understand what they are trying to say."

These are variations on a lament often heard from teachers who work with students with disabilities, especially those language-learning disabilities that have a direct effect on their production of written language. These students might have problems such as the following: generating ideas, organizing ideas, finding the right words to convey ideas, using correct grammar, punctuation, and spelling, and handwriting. While there are no easy answers to these types of general problems, there are ways to create an environment using a variety of technology tools in which students will be more successful writers.

Selecting technology tools

In order to select appropriate technology tools to support writing needs, teachers need to consider the following: the individual student's abilities and needs; the goals of the curriculum based on standards of performance; the specific body of effective

Running head: THE IMPACT OF STRESS ON ACADEMIC SUCCESS IN COLLEGE STUDENTS

The Impact of Stress on Academic Success in College Students

For many undergraduate students, university life is a major transition in their lives (Nakalema & Ssenyonga, 2013). It is a new beginning for most of them, leaving home and parents to study. There are vast differences between high school and college which challenge students. Timing becomes an issue. With no fixed classes for a week, students could be having different classes at different times in a week. Academic work in college demands a lot more individual effort from the student than in high school. These factors(also known as stressors), can lead to a stressful college life. According to Selye (as cited in Murff, 2005), stress is defined as a “nonspecific response of the body to any demands made upon it” (p. 27). In other words, as demands are made on an individual or as situations arise, the body attempts to adjust or adapt to the situation in order to re-establish normalcy (Selye, as cited in Murff). The body cannot always do this and so when the demands on the student are more, they feel stressed out. Stress is mainly a psychological issue and if left untreated by the student, it could impact the academic success quite badly to the point that the student’s grades could get him or her disqualified from the course. We will now look at a more in-depth look of how stress has a negative and positive impact on academic performance.

The screenshot shows a Notion workspace titled "University" with a cover image of graduation caps. Below the title, there are options for "1 backlink" and "Add comment". The main section is "Assignments", which includes an "Assignment List" with a search bar and a "New" button. A table lists assignments with columns for Assignment, Subjects, Due Date, Type of Assignment, and Status.

Assignment	Subjects	Due Date	Type of Assignment	Status
Questionnaire Design and Analysis	PY3101	26/04/2021	Group	Not Started
Critical Appraisal/Review - I/O In The News	PY3105	30/04/2021	Individual	Not Started
Research Proposal	PY3101	17/05/2021	Individual	Not Started
Presentation	PY3105		Group	Not Started
PY3101 Final Exam	PY3101		Individual	Not Started
PY3105 Final Exam	PY3105		Individual	Not Started

At the bottom of the table, there is a summary row: "COUNT 6", "Calculate", "Calculate", "Calculate", and "Cal". Below the table, there is a "To Do" section with a green checkmark and a task "PY3101: State 2".
